

SPECS AND OVERVIEW

The K11000 Barrier has been designed specifically as a pedestrian and low speed zone barrier. Its simple interlocking system allows barriers to remain connected while moving through angles 120 degrees each way.

The barriers are fitted with retro reflective tape and have two apertures topside for fitment of hazard lights, pole signage or extended mesh fencing. The barrier also complies with Australian Standard AS1742-3-1996 Traffic Control Devices for works on roads, Section 3.10.1 (C).

AVAILABLE FOR:
SALES AND HIRE

HEIGHT	1,000mm
WIDTH	570mm
EFFECTIVE LENGTH	2,000mm
OVERALL LENGTH	2,200mm
WEIGHT EMPTY	32kg
WEIGHT FULL	387kg
WATER FILL TO TOP	355 Litres
IMPACT SPEED RATING	n/a kph
JOINING SYSTEM	Interlocking
PROVISION FOR AMBER LIGHT	YES
PROVISION FOR MESH FENCING	YES
PROVISION FOR POLE SIGNAGE	YES
